Abstract

Game theory studies the strategic interactions between and among decision makers, players, through mathematical models called games. This paper presents an overview on the evolution of the application of game theory to fisheries economics. The first applications emerged in the late 1970s.

Abstract

We previously reported that some main olfactory bulb (MOB) mitral/tufted (M/T) cells send a direct projection to the “vomeronasal” amygdala in female mice and selectively respond to volatile male mouse urinary odors. We asked whether MOB M/T cells that project to the vomeronasal amygdala exist in male mice and whether there is a sexually dimorphic response of these neurons to volatile male urinary pheromones.

Gonadectomized male and female mice received bilateral injections of the retrograde

Effects of depression and diabetes self-management on glycemic control in a Chinese population

Keke Lin ^{a, b}, Chang Park ^a  [Show more](#)
<https://doi.org/10.1016/j.jdi.2017.08.001>

Highlights

- Among the factors, depression and diabetes self-management were associated with glycemic control.
- Only diabetes self-management had a direct effect on glycemic control.
- Depression only had an indirect effect on glycemic control through both diabetes self-efficacy and self-management.
- Diabetes distress only had an indirect effects on glycemic control through both diabetes self-efficacy and self-management.

91-100

Abstract:

World Heritage Landscapes (WHLs) are receiving increased attention from researchers, urban planners, managers, and policy makers and many heritage values and resources are becoming irreversibly lost. This phenomenon is especially prominent for WHLs located in cities, where greater development opportunities are involved. Decision making for sustainable urban landscape planning, conservation and management of WHLs often takes place from an economic perspective, especially in developing countries. This, together with the uncertain source of funding to cover WHL operating and maintenance costs, has resulted in many urban

The screenshot displays the Mendeley Desktop interface. At the top, the title bar reads "Mendeley Desktop" and the menu bar includes "File", "Edit", "View", "Go", "Tools", and "Help". The toolbar contains icons for Pan, Select, Highlight, Note, Rotate, Zoom, Fullscreen, Share, and Sync. A search bar in the top right corner contains the text "conflicts".

The main window shows a document titled "Resolving the conflicts of sustainable world heritage landscapes in cities: Fully open or limited access for visitors?". The document is from "Habitat International 46 (2015) 91-100" and is available at ScienceDirect. The Elsevier logo and journal homepage URL are also visible.

A yellow sticky note is attached to the document, containing the text: "You 2015/3/5 21:23:00 Conflicts of sustainable world...".

The sidebar on the right contains the following information:

- Abstract:** World Heritage Landscapes (WHLs) are receiving increased attention from researchers, urban planners, managers, and policy makers and many heritage values and resources are becoming irreversibly lost. This phenomenon is especially prominent for WHLs located in cities, where greater development opportunities are involved. Decision making for sustainable urban landscape planning, conservation and management of WHLs often takes place from an economic perspective, especially in developing countries. This, together with the uncertain source of funding to cover WHL operating and maintenance costs, has resulted in many urban managers seeking private sector funding either in the form of visitor access fees or leasing pa...

Editorial process

Editorial process

- The editorial process selects suitable articles for publication and publishes papers in one standard format.
- The key step is the peer-review process

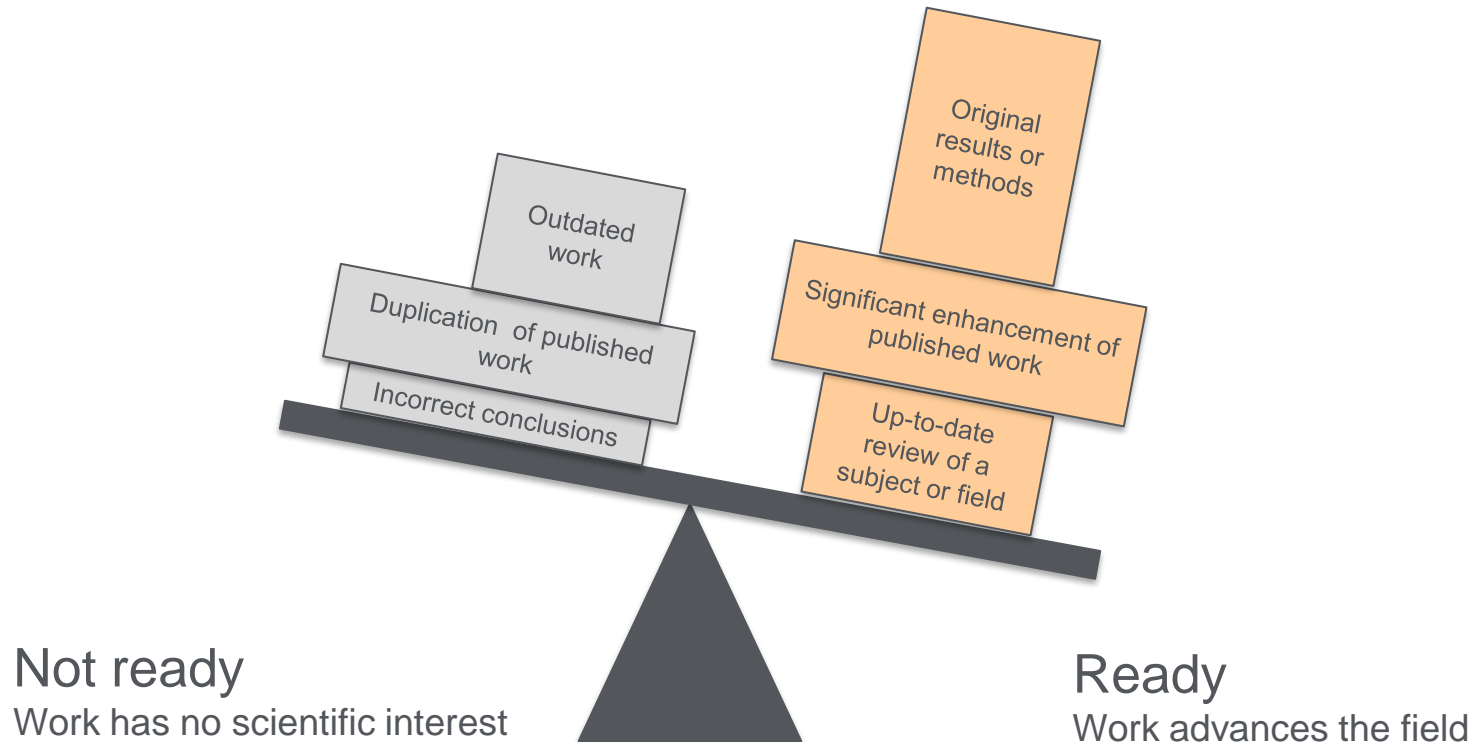

Peer-review process

Developing a manuscript

Think before writing — Planning your article

Are you ready to publish?

Choosing the right journal

Best practices

- Aim to reach the intended audience for your work
- Choose only one journal, as simultaneous submissions are prohibited
- Supervisor and colleagues can provide good suggestions
- Shortlist a handful of candidate journals, and investigate them:
 - Aims & Scope
 - Accepted types of articles
 - Readership
 - Current hot topics

Articles in your reference list will usually lead you directly to the right journals.

为你的科研成果找个好归宿

ELSEVIER

Send us feedback

Find the perfect journal for your article

Elsevier® Journal Finder helps you find journals that could be best suited for publishing your scientific article. Please also consult the journal's Aims and Scope for further guidance. Ultimately, the Editor will decide on how well your article matches the journal.

Powered by the Elsevier Fingerprint Engine™, Elsevier Journal Finder uses smart search technology and field-of-research specific vocabularies to match your article to Elsevier journals.

Simply insert your title and abstract and select the appropriate field-of-research for the best results.

The process of writing – building the article

Title, Abstract, and Keywords

Conclusion

Introduction

Methods

Results

Discussion

Figures/Tables (your data)

Abstract

- Summarize the problem, methods, results, and conclusions in a single paragraph
- Make it interesting and understandable
- Make it accurate and specific
 - A clear abstract will strongly influence whether or not your work is considered
- Keep it as brief as possible

Take the time to write the abstract very carefully. Many authors write the abstract last so that it accurately reflects the content of the paper.

Keywords

- Keywords
- Keywords: **are important for indexing**: they enable your manuscript to be more easily identified and cited. Keywords should be **specific**. Avoid uncommon abbreviations and general terms. Check guide-for-authors for specific keyword policy.
